

1.1.2

Continuous Internal assessment helps to evaluate the progress of students in the prescribed course throughout the academic session. Continuous assessment allows tracking of progress and an opportunity is extended to the students to acquire enhanced support and guidance during the program.

Continuous assessment of students is carried out through various means.

Unit test is carried out on every unit.

Continuous internal evaluation is done through surprise tests, class tests, seminars, and tutorials.

Surprise tests encourage the students to develop their knowledge and skills. It also enables the students to self-assess the progress and understanding of learning that they acquired throughout the academic session. This further provides an exceptional prospect for the teachers and the students to identify the slow learners and advanced learners. Ultimately this methodology helps us to modulate teaching techniques according to the student requirements.

Through Seminars and tutorials, students learn the approaches to problem-solving. It promotes analytical thinking and creativity among students. Students learn communication skills and develop the virtue of articulation.
