VMS RESEARCH FOUNDATION, NAGPUR

VMS foundation was formulated on the Principles of STS (Science & Technology for Society), a movement which has a long history in science education reform and embraces a wide range of theories about the intersection between science & technology and society. The key aim behind these efforts was to ensure the development of a broad-based science curriculum, embedded in the socio-political and cultural contexts in which it was formulated.

To commemorate with Passionate principles of Science & Technology for Society) "VMS Research Foundation, Nagpur Maharashtra, India has come up with two Scientific Research Journals for scientific society which are published four monthly in months of January, May & September. The two Journals are:

1. International Journal of Researches in Biosciences, Agriculture & Technology, IJRBAT. (ISSN No.: 2347-517X)

2. International Journal of Researches in Social Sciences & Information Studies, IJRSSIS. (ISSN No.: 2347-8209)

ABOUT Virtual Multimodal Studies Research Foundation, Nagpur

Virtual Multimodal Studies Research Foundation VMS Research Foundation, Nagpur (Global Peace Multipurpose Society) was formulated on the STS (Science, Technology and Society) movement which has a long history in science education reform and embraces a wide range of theories about the intersection between science, technology and society. The key aim behind these efforts was to ensure the development of a broad-based science curriculum, embedded in the socio-political and cultural contexts in which it was formulated. We would also understand the relevance of scientific discoveries, rather than just concentrate on learning scientific facts and theories that seemed distant from their realities.

VMS Research Foundation, Nagpur aims towards

- An interdisciplinary approach to science education, where there is a seamless integration of economic, ethical, social and political aspects of scientific and technological developments in the science curriculum.
- Engaging Researchers in examining a variety of real world issues and grounding scientific knowledge in such realities.
- Enabling students to formulate a critical understanding of the interface between science, society and technology.
- Developing students' capacities and confidence to make informed decisions and to take responsible action to address issues arising from the impact of science on their daily lives.
