**Sub:** Invitation for MECL Hackathon 2024.

Dear Sir/Madam,

MINERAL EXPLORATION AND CONSULTANCY LTD. (MECL) as an autonomous Public Sector Company, under the administrative control of Ministry of Mines, Government of India is pleased to invite your esteemed college to participate in an exciting and innovative event - our upcoming MECL Hackathon 2024.

The main purpose of the event is to transform India into a knowledge-based economy and a digitally empowered society by ensuring digital services, digital access, digital inclusion, digital empowerment and bridging the digital divide under Digital India Programme launched by Prime Minister Shri Narendra Modi.

Hackathons have become increasingly popular as they provide a platform for students to showcase their creativity, problem-solving skills, and technical expertise. We believe that participation in hackathons can be an enriching experience for your students, offering them opportunities to network with industry professionals, collaborate with peers, and gain valuable hands-on experience.

By participating in the MECL Hackathon, students will have the chance to:

- Work on real-world challenges and projects
- Learn new technologies and tools
- Connect with potential employers and mentors
- Win prizes and recognition for their achievements

We look forward to hacking with two teams from your college (Team of 5 students each) and diverse teams may be constituted with unique names. The names of the teams are to be submitted within 10 days.

You are also requested to provide name of a nodal person from your college for co-ordination purpose.

Details about the MECL Hackathon 2024 event are attached herewith.

Thanking you in anticipation.

Yours faithfully,

Director (Technical)

My overall experience is good 😊 everyone was very supportive

It is really a good event I appreciate the hard work and dedication of the working stuff of MECL group. Thank you for taking care of us and holding such inspiring event for us.

I really enjoyed the event. The support staff was also very helpful, and I learned a lot from this hackathon. I thank all the management staff for organizing such an event, and I hope this experience will definitely help me in future opportunities. It was great event and I learnt a lot during the whole hackathon. I think extending these type of opportunities to recent graduates and post graduates who are transitioning from academic environments to the professional world would be really great as well. Providing platforms for continued learning and application of skills can significantly enhance their employability and career readiness. Offering hackathons, workshops, and industry projects specifically aimed at graduates can help bridge the gap between education and employment.

This event was successful and help me to develop more skills

The event was great. It accelerated the potential inside us to develop new technology. This type of events should be continued for various categories like web/app development, graphics design, game development, etc.

Feeling inspired after participating in the MECL Hackathon and tackling the challenge of creating a Chatbot for NGDR Acts, Rules and Regulation. The learning and growth that came from this experience were truly invaluable.

Hackathons provide an opportunity for participants to experiment with new ideas, explore new technologies, and build prototypes of their products in a short amount of time.

It was a great opportunity to connect with so many talented individuals. A big thank you to the organizers of Mineral Exploration and Consultancy Limited for organizing a Wonderful Event.

The overall analysis of the feedback given by students reveals that most of the students were satisfied with the event organized by MECL. Students will be encouraged to take part in this event every year for skill development and placements.
